Best Practices Evaluation Guide

As a part of this program, INFiN has created a Best Practices Store Evaluation Guide. This self evaluation tool should be used to objectively quantify how well your store(s) compare to the industry's best practices. It should be used to identify areas where a facility is currently up to the industry's standards and others that could use improvement. **The Guide should be completed by all award participants for the store that is nominated and be included as a part of the submission.**
